

Medleaf Tropicana

TROPICANA ACTIVE INGREDIENTS: TOTAL THC 16% TOTAL CBD <1%

Note: Total terpene quantity and ratio varies by batch and is "uncontrolled".

FLOWER CHARACTERISTICS

Medleaf Tropicana is a Sativa Dominant hybrid crossed from the Sativa "Tangie" and the Hybrid "GSC". It is a Medium THC product with a strong Sativa leaning expression.

Physically, the cultivar can be readily recognized by a more dominant expression of purple coloring than is standard. Both the leaves and flowers readily develop a purple shade independent of temperature. The purple flowers are typically coupled with a darker green in the flowers and accompanied by bright orange pistils.

AROMA

Fragrance of citrus, cinnamon and sugar but with a spicy touch.
